

CERGE-EI TEACHING FELLOWS COURSE STUDENT EVALUATIONName of Teacher: **Pyrlik, Vladimir**Name of Course(s): **Time Series**Institution: **Higher School of Economics****Time Series****SELECTED STUDENT COMMENTS**

- It's greatly delivered with all possible technologies (green screen, Padlet, Wooclap etc.), it's quite deep and informative and also very useful
- In my point of view this course is more structured than online courses on Time Series that i faced. The teacher was starting a lecture very slowly and then we didn't have time to finish everything we needed. Maybe if a lecture kept the same pace (fast) all the time it would be more effective and students would be more concentrated.
- The presentation of the material is well-structured and convenient, an impressive course, technology and the teacher's desire to conduct distance learning on a par (and even higher) with full-time. Special thanks for the padlet, wooclap and recordings of all activities!
- It's essential for any econ students, who's interested in quantitative analysis. It gives enough information for students to be able to start working with time series projects and actually gives some experience in doing so. It's not overloaded with additional but not that important material. The delivery in general was nice. It's always a pleasure to learn from professional instructors.
- I would recommend this course as the teacher is very cool, lectures were hold in a very comfortable way. I especially like the way presentations were made, many teachers make useless slides or write lecture manually on the boards and nothing could be seen, but THIS ONE made everything to his possible to perform material in a convenient way, this is very valuable in case of distance learning.
- The organization of the course was great, the material was clearly and accurately explained. I would like to evaluate separately the work of the teacher as he was available for any questions and I think he did even more than he had to for students' understanding of the course! Thanks the university and Vladimir Pyrlik for the great course!!!
- I would recommend this course to other students because it was very useful. The material was delivered in accessible and understandable language. There were enough practical examples, reviews of tests and explanations for a better understanding. I would like to single out the promptness of the checks and the answers to the questions that have arisen, this has been very helpful and inspiring to learn and to be more assiduous.

CERGE-EI TEACHING FELLOWS COURSE STUDENT EVALUATION

Name of Teacher: **Pyrlik, Vladimir**

Name of Course(s): **Time Series**

Institution: **Higher School of Economics**

OVERALL PERFORMANCE RATING POINTS DISTRIBUTION

(Scale 1-5. with 5 being the best)

COURSE

Course Assessment	Demanding	Exercise Sessions	Lectures	Linked to Real Life Economics	Overall Course Assessment	Average Course Score
Time Series	3.70	4.65	4.61	4.22	4.55	4.35
Semester Average (184 Teaching Fellows)	3.82	4.50	4.53	4.29	4.48	4.32

TEACHER
